### Design Engineer

#### Description

**Design Engineer | Construction | Scaffolding | Temporary Works**

*\*Hybrid working – However applicants will need to attend sites occasionally in central London\**

Up to £65,000 per annum, plus health, pension and annual bonus

An opportunity to work for a leading specialist subcontractor at the pinnacle of their sector operating on major building projects throughout London and the Southeast.

Our client, a long-established name in the field of temporary works and scaffolding is looking to grow their in-house design team. They are now looking for a talented design draughtsman/woman to enhance their highly professional team using the latest technology to include drones.

The role will involve the production of detailed drawings on AutoCAD, two dimensional for bid and planning purposes. Experience of 3D design using Revit / BIM would be advantageous, although full training will be given.

This is a permanent position offering career development and educational advancement, through accredited training schemes. Previous experience of building related projects is essential and any exposure to temporary works or scaffolding would be a distinct advantage. You will work closely with both main contractors and engineering consultants and occasional travel to sites will be required.

If you are looking to develop your career with a company that recognises and rewards achievement, then please apply to Jamie Pearson quoting the job reference: JP1002
