## Design Engineer

### Description

**Design Engineer – Specialist Contracting – Major Projects – Scaffolding – London**

**Up to £45,000 per annum + Pension**

An opportunity to work for a leading specialist sub contractor on major building projects throughout London and the South East.

Our client, a long-established name in the field of temporary works and scaffolding is looking to grow their in-house design team and as a result they are now looking for a talented design engineer to embrace the latest technology and create detailed drawings in both 2D and 3D. In addition, you will calculate and analyse the structural integrity of your design proposals and put together comprehensive risk assessments in adherence to the latest codes of practice.

This is a permanent position offering career development and educational advancement, through accredited training schemes. Previous experience of building related projects is essential and any exposure to temporary works or scaffolding would be a distinct advantage. You will work closely with both main contractors and engineering consultants and occasional travel to sites will be required.

If you are looking to develop your career with a company that recognises and rewards achievement, then please upload your CV to Jamie Pearson quoting the job reference: Design Engineer JP658

Candidates must be already be living within a daily commute of central London. Driving licence is not required as projects are within the confines of Greater London.
