Design Manager Construction

Description

Design Manager Construction |Luxury Fit-Out | Super Prime London Residences

We are seeking an **experienced Design Manager from a contracting background** to act as the lead on a flagship high-end residential development in London, acting on behalf of a long-established luxury fit-out contractor, who has reputation for excellence and innovation.

In this role, you will be the link pin between the design and operational interface on a live project, ensuring all design information is fully coordinated and compliant with client requirements, programme timelines and budgets.

Key Responsibilities:

- Manage internal design team, consultants and subcontractors to meet programme and budget requirements.
- Chair design meetings, monitor approvals and oversee RFIs.
- Ensure compliance with contractual obligations, Building Regulations, CDM, and project standards.
- Provide technical solutions to design and buildability challenges.
- Maintain strong client and stakeholder communication, providing regular updates.

What We're Looking For:

- Ideally a qualification in a construction related field, construction management or design.
- Proven experience in design management on luxury construction or fit-out projects.
- Excellent knowledge of 2D/3D design, BIM processes and design coordination.

If you are a **design-focused professional** ready to take ownership of high-profile London projects, this is the perfect opportunity to make an impact. Please upload your CV below quoting the reference: JP1021
