Design Manager Construction

Description

Design Manager – Luxury Hotel Developments, London

Up to £100,000 package or equivalent day rate

Our Client

Is a new entity in the luxury development sector in London, acting as developer-contractor they are building a series of new hotels, from new builds to repurposing listed structures with retained façades, with spa facilities and destination restaurants in London.

Responsibilities

- Lead full RIBA stages from early concept to completion
- Implement modern construction methods, value engineering and buildability. Ensuring the design is the most efficient possible, maximising space and revenue
- Manage the design process on live large-scale hospitality and mixed-use developments
- Maintain rigorous compliance with UK Building Regulations, planning policy, and construction law
- Utilise BIM & Common Data Environments (e.g. Viewpoint, Aconex) for seamless multidisciplinary design integration
- Familiar with AutoCAD and Revit

Key Criteria

A degree in Architecture, Civil Engineering or Construction Management.

A track record managing design on large-scale residential, commercial or hotel projects in the luxury development sector in the UK.

Apply here

Whilst this is a permanent position, my client would also consider someone on a fixed term contract.
