Document Controller

Description

Freelance Document Controller – Construction – London

Up to £220.00 per day shift

An urgent requirement for an intermediate level Document Controller on a prestigious residential development in London. The role will be office based in the West End, working within our client's highly professional delivery team.

Applicants must be from a building background, having worked for either a Contractor, Consultancy or Developer on major projects as a Document Controller or Project Administrator. A good working knowledge of EDMS systems, specifically Aconex and 4Projects is essential.

A confident communicator you will liaise with the project team and specialist subcontractors and have the ability to manage the data flow and ensure subcontract instructions and change orders are conveyed in a timely and efficient manner. As well as driving the document management software you will be adept with Microsoft Office Packages, particularly Excel.

Key Requirements:

- Fluent written and spoken English
- Previous Document Control experience (Aconex / 4Projects)
- Construction (building) experience within the last five years in the UK
- The ability to read and interpret construction contracts/drawings

Please upload your CV through our website in strict confidence quoting the reference: Freelance Document Controller JP806
