Health & Safety Manager Construction

Description
Health & Safety Manager Stevenage, Hertfordshire

Up to £65,000 per annum plus pension

Our client is a privately owned and operated construction company with traditional values. As part of their continued growth, they have a requirement for a Health and Safety Manager to join their team in North Hertfordshire.

This is not a traditional site-based health and safety role, although occasional visits may be required. It is more of a compliance role, with the main emphasis being contract administration, ensuring insurance policies are up to date and method/risk assessments are carried out and recorded. You will work closely with the contracts management team to coordinate the data flow, accurately maintaining their system, checking CSCS cards, health and safety certifications and CDM requirements are up to date as well as implementing ISO standards.

Its likely applicants will be from a building background having worked in Health and Safety with NEBOSH certification. Prior exposure working for a building contractor in a H&S role is essential.

A good aptitude of both spoken and written English is key and proficient with Microsoft based applications to include Excel, Outlook and Word.

If you would like to join a busy, friendly, small team, please apply in strict confidence quoting the reference: Health & Safety Manager JP1056
