### Revit Technician Construction

#### Description

**Revit Technician | High-End Residential, Hotel & Restaurant Projects | London**

**£55,000 to £65,000 package or equivalent day rate**

Join a developer-contractor shaping London's most prestigious lifestyle destinations in their inhouse design team.

#### Responsibilities

- Create detailed 2D and 3D technical drawings/models in Revit from architectural, structural, or MEP scopes of works
- Deliver digital modelling support from concept through construction
- Maintain Revit models to BIM Level 2 standards, ensuring design feasibility, accuracy and buildability
- Work with architects, engineers, consultants, and contractors to produce clash-free designs
- Build and manage templates, and libraries in Revit
- Generate schedules, sections, elevations, and details directly from models
- Lead design coordination and BIM meetings internally and externally

#### Key Criteria

- A degree or HNC/HND in a design related field within construction
- Proven experience managing technical Revit design on large-scale developments (residential, hospitality, commercial)
- Strong knowledge of UK Building Regulations and planning policy
- Proficiency in Revit, AutoCAD, and Microsoft Project
- Hands-on with BIM workflows & Common Data Environments (e.g., Viewpoint, Aconex)
